

Family PACT: Concurrent Complication Laboratory Codes – Urinary Tract Infection (UTI) and Dysplasia

familypact40

1

This section of the Family PACT Laboratory Procedures identifies the procedure codes to be used for Family PACT Urinary Tract Infection (UTI) and dysplasia treatment complication services described in *Family PACT: Complications Services Overview [familypact13]* section in this manual. These codes are billed with the appropriate concurrent ICD-9-CM diagnosis, together with the appropriate (client's Family Planning Method) Family PACT primary diagnosis "S" code indicating treatment complications. For information about "S" codes and suffixes, see the *Family PACT: Core Services Overview [familypact11]* section in this manual.

Concurrent Complication Services (Females Only)

Concurrent complication services are limited to females only.

TAR Requirements

Complication services require prior authorization for both Family PACT and non-Family PACT providers. The *Treatment Authorization Request* (TAR) requirement includes clinician, Laboratory, Pharmacy and hospital providers.
